## Career Objective

Motivated and detail-oriented MCA graduate with strong knowledge of programming, web technologies, and database systems. Looking for an opportunity to utilize my technical skills and grow as a software professional in a dynamic organization.

## PROJECT

- **Car Price Prediction using Machine Learning:** Developed a machine learning model to predict car prices based on features like brand, model, year, mileage, fuel type, etc. Used regression algorithms such as Linear Regression and Random Forest. Implemented data preprocessing, feature engineering, and model evaluation in Python using libraries like Pandas, Scikit-learn, and Matplotlib.
- **Quiz Application:** Designed and developed a responsive quiz web application using HTML and CSS for the user interface, and JavaScript for dynamic functionality such as random question selection, countdown timer, and real-time score tracking. Integrated with a PHP API to fetch quiz questions and store user results securely.
- **MyPortfolio:** A personal portfolio website built using React.js, Vite, Bootstrap, and Tailwind CSS to showcase my skills, projects, and learning journey as a web developer. It features a contact form for direct communication and a resume download button for easy access. Designed with a clean, modern, and fully responsive layout that works perfectly on both desktop and mobile devices.
